ABOUT THE SYSTEM

INTELLIGENT DUAL-WEIGHTMENT PLATFORM

A fully automated platform combining CCTV-based ANPR with precision weighbridge sensors. Every truck entry and exit is captured, verified, and recorded — zero manual input, zero errors, tamper-proof audit trail for every transaction.

MISSION

To eliminate weighment errors through intelligent dual-weightment automation that ensures complete vehicle traceability and fraud prevention.

VISION

To become the most trusted global platform for weighbridge automation — empowering industries with zero-error operations and full compliance.

THE DUAL WEIGHMENT PROCESS

A two-step automated flow captures vehicle identity and weight at entry and exit — delivering precise net material measurement with full audit records.

ENTRY WEIGHT		EXIT WEIGHT		NET MATERIAL WEIGHT
28,400 kg	—	12,300 kg	=	16,100 kg
GROSS (LOADED)		TARE (EMPTY)		AUTO-CALCULATED

- ✓ Instant report generated
- 🔒 Full audit trail saved
- 🚫 Zero manual entry required

CUSTOMER FOCUS

KEY FEATURES

Built for zero-error industrial weighment — every feature engineered to automate, protect, and trace.

ANPR — AUTOMATIC NUMBER PLATE RECOGNITION

AI-powered CCTV cameras automatically capture and verify vehicle number plates at both entry and exit. Works in all lighting and weather conditions with 99.5% accuracy — no operator input needed.

DUAL-WEIGHTMENT AUTOMATION

Automatically captures gross and tare weights and calculates net weight instantly.

VEHICLE MATCHING

Links entry and exit records by plate number and flags mismatches or duplicates entries.

FRAUD PREVENTION

Links entry and exit records by plate number and flags mismatches or duplicates.

FULL AUDIT TRAIL

Securely logs every transaction with complete traceability for compliance.

REAL-TIME REPORTS

Generates instant PDF/Excel slips and detailed movement reports.

ROLE-BASED ACCESS

Secure, multi-level access control with activity monitoring.
